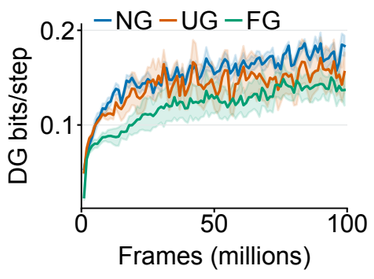

Figure 2 · box plots and other loose components

NG = no goal · UG = uniform goal · FG = frontier goal. + marks extra candidates; boxes are 1.2 × 1.0 in.

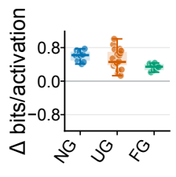

Spatial emergence

Spatial emergence

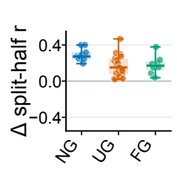

Frozen-behavior comparison

Readout coding under the learned policy

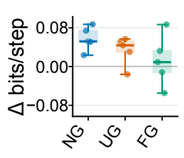

Spatial-map reliability under policy

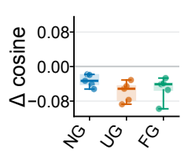

Push ablation · DG encoder credit

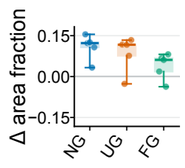

DG spatial coding

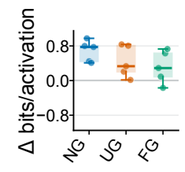

DG map overlap

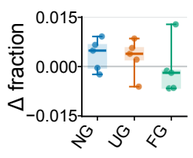

Field-peak coverage

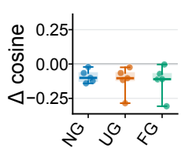

Readout layer 1 coding

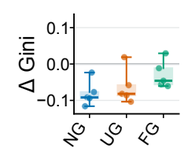

DG activity fraction +

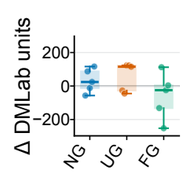

Prethreshold DG map overlap +

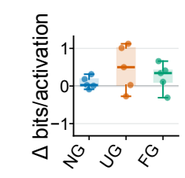

Unevenness of peak coverage +

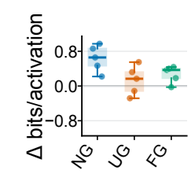

Separation of field peaks +

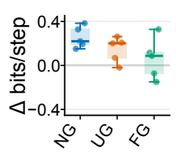

CA3 coding per activation +

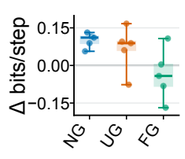

Readout layer 2 coding +

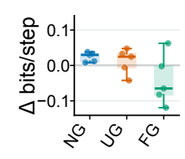

CA3 amplitude-weighted coding +

Readout layer 1 weighted coding +

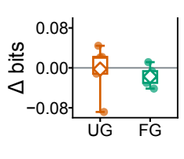

Readout layer 2 weighted coding +

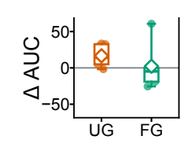

Pull ablation · worker credit

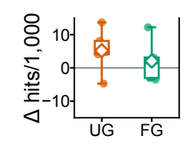

High credit: DG coding +

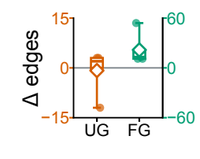

High credit: coverage +

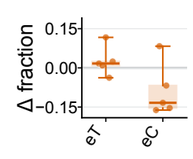

High credit: hit rate +

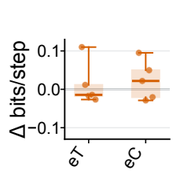

High credit: graph edges +

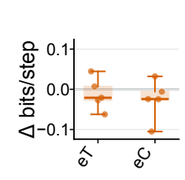

Worker credit: visited coverage

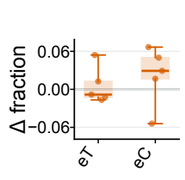

Worker credit: online DG coding

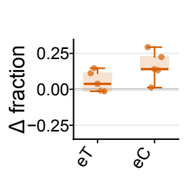

Worker credit: replayed DG coding +

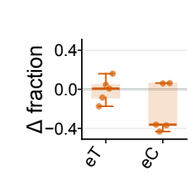

Stored-graph reachability +

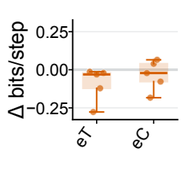

Stored-graph prospective success +

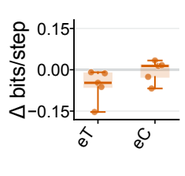

Sampled-path efficiency +

Worker credit: readout layer 1 +

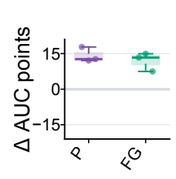

Worker credit: readout layer 2 +

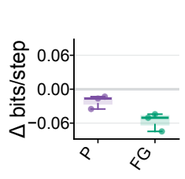

Longer PPO and GAE credit

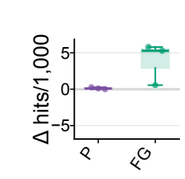

Longer PPO credit: coverage

Longer PPO credit: frozen DG coding

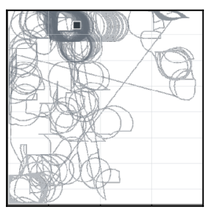

Longer PPO credit: detector hits +
