FG/C15: 100M-frame DG peak locations

Constant vs temporal worker bonus · shared 318-bin mask and color scale

A = effective area fraction; NN = median nearest-peak distance after the 0.25% cutoff

- Peak used for coverage and cutoff-matched spacing
- Eligible peak below 0.25% activity

Circle numbers mark coincident peaks; crosses mark eligible units excluded by the coverage cutoff. Unit identities are not matched across independently trained networks.
